

Get into teaching Mathematics

On Wednesday 5 May we will be hosting a 'Get into teaching Mathematics' online information event.

This event has been designed to provide information and support for mathematics graduates, undergraduates and career changers who are considering Mathematics teaching at secondary and/or post 16 level as a possible future career.

We are looking to recruit and engage Maths graduates and graduates with Maths related content in their degree to our outstanding school direct ITT programme starting in September 2021. We have places available on our Secondary 11-16 programme and our Secondary 14 -19 programme, so if you want to find out about teaching Mathematics in a secondary school or at post 16 we will be delighted to share our expertise with you. Our School Direct programmes will offer you the chance to immerse yourselves in the life of a school, discover first-hand what teaching can offer in terms of career and progression and to observe best practice from outstanding practitioners and professionals in an informative, nurturing and inspiring manner.

At this event, you will be:

- Provided with information about possible routes into teaching and the financial support available.
- Made aware of the potential and benefits that a career in teaching can provide.
- Discover the details and structure of the outstanding training year which will equip you to become a newly qualified teacher (NQT).
- Find out about the placements that you will complete as part of your training in our local schools. All of our schools have a passion to train and develop inspirational teachers who are highly employable and dedicated professionals.

Why choose the CTA for training to teach Mathematics?

Both Our Lady's Catholic High school and Cardinal Newman College are passionate about teaching Mathematics and developing outstanding future Maths teachers – they are the lead schools for Abacus NW Maths Hub – leading over 600 schools in high quality Mathematics professional development. In September 2022 Cardinal Newman College in collaboration with the University of Lancaster will open its doors to its new Maths School, this exciting extension to already outstanding Maths provision will be one of only 3 Maths Schools in the whole country.

Who should attend?

Graduates, undergraduates and career changers who want to find out more about careers in Maths teaching and possible routes into teaching.
